Bobby Paggett had not been home in five year since he was drafted by the military. He had one dream that kept him going through that time. He was going to reunite with the love of his life Sam. Sam was his focus and now as he walks down Main Street he recalls how he left. What he went through once he left and how his life changed in those years. Did it change for the love of his life and the town he called home as much as it did for him? To know those answers you'll just have to read the book.

I dislike stories of human tragedy. I don't think anyone who reads them will actually tell you they enjoy them. They tear us up inside and if you can read this or any or any story similar to it without having to put the book down because you hurt for the characters you may need to check your own pulse.

As gut twisting as this story is, you will be happy to know that the author stayed true to himself and his story. The ending may not satisfy all readers but he writes honestly. To me this is a sign of a great writer and someone I respect. I definitely find that this is a book more than fit to read.
